OPEN POSITION ANNOUNCEMENT

Applications are invited for a position to work on the FP7-REGPOT-2010-5 project “Upgrading the capacities for research in translational medicine at the Faculty of Medicine University of Rijeka” (TransMedRi) coordinated by Dr. Bojan Polić (<http://www.medri.hr/~bojanp>).

This three-year technological project is aimed at further strengthening of the collaboration between investigators at MEDRI and the EU countries, organization and development of formal training programmes for investigators and implementation of an efficient program of research capacity building with **emphasis on the translational medicine in cancer and infectious diseases**.

1. Experienced Researcher / Senior PostDoc – Cancer Biology Expert (m/f)

A Senior Postdoc (“Experienced Researcher”) position for a cancer biology expert is available at the Faculty of Medicine University of Rijeka as part of the **FP7-REGPOT-2010-5 project** “Upgrading the capacities for research in translational medicine” (TransMedRi).

Required qualifications and skills:

- PhD degree
- Excellent proficiency in written and spoken English
- Strong computer skills, including MS Office applications
- Position is open to all nationalities

We are looking for a highly motivated postdoctoral scientist with good experience in molecular and cell biology. Expertise in gene targeting in the mouse is highly desirable.

Project work package involved: “Enhancement of the research potential for cancer at MEDRI” (WP2)

Period of appointment: 18 months (contract extension possible via University of Rijeka - Faculty of Medicine)

Type of position: full-time

Application documents required: Curriculum Vitae (in English) including contact details of two references and Letter of intent

Please, submit your application documents to the following e-mail: vsinisa@medri.hr (Prof. Siniša Volarević, M.D., Ph.D)
